PROJECTS

Live Music Analytics Pipeline

GitHub

End-to-End BI Pipeline - Python, SQL, dbt, Snowflake, Streamlit, GitHub Actions

Spring 2026

- Designed and built a data pipeline ingesting 1,900+ live music events from Ticketmaster, Spotify, and SeatGeek APIs into a Snowflake star schema, modeling the analytical workflows of a Sr. BI Analyst at a major ticketing platform like AXS.
- Authored dbt staging views, mart tables, and 17 data-quality tests to transform raw API data into a dimensional model (fact_events, dim_artists, dim_venues, dim_dates), enabling cross-source analysis of streaming demand, ticket pricing, and tour revenue.
- Deployed an interactive Streamlit dashboard with five analytical tabs - pricing analytics, artist demand signals, geographic event distribution, and scheduling trends - surfacing insights such as California's 2x price premium and Thursday scheduling dominance.
